Young + Old = Union Power

If the members you represent are from more than one generation, the odds are good that you've heard these questions more than once:

"Why don't these young kids appreciate the struggles this union went through to win what we have in our contract?"

"How come you older folks always shoot down our ideas and insist on doing things the way you've always done them?"

As a steward, whatever your age, your job is to represent and unite members of all generations. This can be challenging, especially when there are barriers to communication and understanding between the "old-timers" and the "kids."

Telling the Union Story

It's legitimate for the long time members to want newer members to appreciate that history. The timing is critical, however. Probably most of you have an older relative who, when the discussion turns to how easy things the way you've always done them?"

Meanwhile, some younger members are impatient with their older co-workers who are slow to adapt to new technology. Sometimes more senior members belittle their younger co-workers for always "tweeting and texting."

Communication and Technology

One of the most obvious differences between generations is how they communicate, and particularly their comfort level with technology. Sometimes more senior members belittle their younger co-workers for always "tweeting and texting."

Building Relationships Is Key

The key to uniting people is building relationships. In your area members of one generation are less involved than others, you should reach out to the most receptive members from that generation and get to know them. Make connections between generations and help smooth out miscommunications. Consider mentoring programs where each newer member has a more experienced mentor to help them: not only to learn about and get involved in the union, but to guide them in learning "the ropes" at work.

Your job as a steward is to help members of all generations recognize that they need each other, especially in these challenging times, to strengthen the union. Encourage your members to listen and seek to understand each other. Find influential members from each generation to help bring people together around issues and activities that improve everyone's work life.

An entire generation of union leaders and activists is nearing retirement age. Unions need young leaders to step up to replace them and lead the labor movement into the future. If you are one of those with years of experience in union building, your job is to help find and prepare the next generation of leadership. If you are a young leader, you should learn from those who came before and prepare yourself and your peers for the challenges ahead.
