# Small Business: Access to Capital and Job Creation

## **Abstract**

[Excerpt] This report addresses a core issue facing the 113th Congress: What, if any, additional action should the federal government take to enhance small business access to capital? After discussing the role of small business in job creation and retention, this report provides an assessment of the supply and demand for small business loans, including the number and amount of small business loans guaranteed by the SBA. It also discusses selected laws enacted during the previous three Congresses that were designed to enhance small business access to capital by increasing the supply of small business loans or the demand for small business loans, or both. It also examines recent actions concerning the SBA's budget and concludes with a brief overview of three legislative options available to address small business access to capital issues during the 113th Congress: wait-and-see, enact additional programs, or reduce and consolidate existing programs.

## Summary

The SBA administers several programs to support small businesses, including loan guaranty and venture capital programs to enhance small business access to capital; contracting programs to increase small business opportunities in federal contracting; direct loan programs for businesses, homeowners, and renters to assist their recovery from natural disasters; and small business management and technical assistance training programs to assist business formation and expansion. Congressional interest in these programs has increased in recent years, primarily because assisting small business is viewed as a means to enhance economic growth.

Some, including President Obama, have argued that the SBA should be provided additional resources to assist small businesses in acquiring capital necessary to start, continue, or expand operations and create jobs. Others worry about the long-term adverse economic effects of spending programs that increase the federal deficit. They advocate business tax reduction, reform of financial credit market regulation, and federal fiscal restraint as the best means to assist small business economic growth and job creation.

During the 111<sup>th</sup> Congress, several laws were enacted to enhance small business access to capital. For example, P.L. 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA), provided the SBA an additional \$730 million, including \$375 million to temporarily subsidize SBA fees and increase the 7(a) loan guaranty program's maximum loan guaranty percentage to 90%. P.L. 111-240, the Small Business Jobs Act of 2010, authorized a \$30 billion Small Business Lending Fund to encourage community banks to provide small business loans (\$4 billion was issued), a \$1.5 billion State Small Business Credit Initiative to provide funding to participating states with small business capital access programs, numerous changes to the SBA's loan guaranty and contracting programs, \$510 million to continue the SBA's fee subsidies and 90% maximum loan guaranty percentage through December 31, 2010, and about \$12 billion in tax relief for small businesses. The SBA subsequently was provided authority to continue the fee subsidies and the 90% maximum loan guaranty percentage through March 4, 2011, or until available funding was exhausted, which occurred on January 3, 2011.

During the 112<sup>th</sup> Congress, several bills were introduced to enhance small business access to capital, including bills to extend the SBA's temporary fee subsidies and the 90% maximum loan guaranty percentage. Congress did not adopt these legislative efforts. Instead, Congress passed legislation to enhance small business contracting opportunities, expand access to the SBA's surety bond guarantee program, amend the SBA's size standard practices, require a review and reassessment of the federal procurement small business goaling program, and expand small business mentor-protégé programs.

This report addresses a core issue facing the 113<sup>th</sup> Congress: What, if any, additional action should the federal government take to enhance small business access to capital? After discussing the role of small business in job creation and retention, this report provides an assessment of the supply and demand for small business loans, including the number and amount of small business loans guaranteed by the SBA. It also discusses selected laws enacted during the previous three Congresses that were designed to enhance small business access to capital by increasing the supply of small business loans or the demand for small business loans, or both. It also examines recent actions concerning the SBA's budget and concludes with a brief overview of three legislative options available to address small business access to capital issues during the 113<sup>th</sup> Congress: wait-and-see, enact additional programs, or reduce and consolidate existing programs.

## Small Business Access to Capital

The Small Business Administration (SBA) administers several programs to support small businesses, including venture capital programs to provide “long-term loans and equity capital to small businesses, especially those with potential for substantial job growth and economic impact”<sup>1</sup> and loan guaranty programs to encourage lenders to provide loans to small businesses “that might not otherwise obtain financing on reasonable terms and conditions.”<sup>2</sup> Historically, one of the justifications presented for funding the SBA’s access to capital programs has been that small businesses can be at a disadvantage, compared with other businesses, when trying to obtain sufficient capital and credit.<sup>3</sup> As an economist explained:

Growing firms need resources, but many small firms may have a hard time obtaining loans because they are young and have little credit history. Lenders may also be reluctant to lend to small firms with innovative products because it might be difficult to collect enough reliable information to correctly estimate the risk for such products. If it’s true that the lending process leaves worthy projects unfunded, some suggest that it would be good to fix this “market failure” with government programs aimed at improving small businesses’ access to credit.<sup>4</sup>

Congressional interest in the SBA’s access to capital programs has increased in recent years, primarily because assisting small business in accessing capital is viewed as a means to enhance job creation and economic growth.<sup>5</sup>

Some, including President Obama, have argued that the SBA should be provided additional resources to assist small businesses in acquiring capital necessary to start, continue, or expand operations and create jobs. They note that small businesses have led job formation during previous economic recoveries.<sup>6</sup> In addition, the SBA has argued that “improving access to credit by small businesses is a crucial step in supporting economic recovery and job creation.”<sup>7</sup>

Others worry about the long-term adverse economic effects of spending programs that increase the federal deficit. They advocate business tax reduction, reform of financial credit market regulation, and federal fiscal restraint as the best means to assist small business economic growth and job creation.<sup>8</sup>

Economists generally do not view job creation as a justification for providing federal assistance to small businesses. They argue that in the long term such assistance will likely reallocate jobs within the economy, not increase them. In their view, jobs arise primarily from the size of the labor force, which depends largely on population, demographics, and factors that affect the choice of home versus market production (e.g., the entry of women in the workforce). However, economic theory does suggest that increased federal spending may result in additional jobs in the short term. For example, the SBA reported in September 2010 that the \$730 million in additional funding provided to the agency by P.L. 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA), created or retained 785,955 jobs.<sup>9</sup>

As will be discussed, the tightening of private sector lending standards and the disruption of credit markets in 2008 and 2009 led to increased concern in Congress that small businesses might be prevented from accessing sufficient capital to start, continue, or expand their operations—actions that were expected to lead to higher levels of employment. As the SBA indicated in its FY2010 congressional budget justification report:

Over the last decade, small businesses across this country have been responsible for the majority of new private sector jobs, leaving little doubt that they are a vital engine for the nation's economic growth. However, with the United States facing the most severe economic crisis in more than 70 years, small businesses are confronted with a frozen lending market and limited access to the capital they need to survive and grow at this critical time.<sup>10</sup>

Since then credit markets have improved and lending standards have moderated, but congressional concern about the economy and disagreements concerning the best means to enhance job creation and economic growth remain.

During the 111<sup>th</sup> Congress, several laws were enacted to enhance small business access to capital. For example, P.L. 111-5 provided the SBA an additional \$730 million, including \$375 million to temporarily subsidize SBA fees and increase the 7(a) loan guaranty program's maximum loan guaranty percentage to 90%. P.L. 111-240, the Small Business Jobs Act of 2010, authorized the Secretary of the Treasury to establish a \$30 billion Small Business Lending Fund to encourage community banks to provide small business loans (\$4 billion was issued), a \$1.5 billion State Small Business Credit Initiative to provide funding to participating states with small business capital access programs, numerous changes to the SBA's loan guaranty and contracting programs, \$510 million to continue the SBA's fee subsidies and the 7(a) program's 90% maximum loan guaranty percentage through December 31, 2010, and about \$12 billion in tax relief for small

businesses (see the **Appendix** for a list of its key provisions). The SBA subsequently was provided authority to continue the fee subsidies and the 90% loan guaranty percentage through March 4, 2011, or until available funding was exhausted, which occurred on January 3, 2011.<sup>11</sup>

During the 112<sup>th</sup> Congress, several bills were introduced to enhance small business access to capital, including bills to extend the SBA's temporary fee subsidies and increase the 7(a) program's loan guaranty percentage to 90%.<sup>12</sup> Congress did not adopt these legislative efforts. Instead, Congress passed legislation designed to enhance small business contracting opportunities, expand access to the SBA's surety bond guarantee program, amend the SBA's size standard practices, require a review and reassessment of the federal procurement small business goaling program, and expand small business mentor-protégé programs.<sup>13</sup>

This report addresses a core issue facing the 113<sup>th</sup> Congress: What, if any, additional action should the federal government take to enhance small business access to capital? After discussing the role of small business in job creation and retention, this report provides an assessment of the supply and demand for small business loans, including the number and amount of small business loans guaranteed by the SBA. It also discusses selected laws enacted during the previous three Congresses that were designed to enhance small business access to capital by increasing the supply of small business loans or the demand for small business loans, or both. It also examines recent actions concerning the SBA's budget and concludes with a brief overview of three legislative options available to address small business access to capital issues during the 113<sup>th</sup> Congress: wait-and-see, enact additional programs, or reduce and consolidate existing programs.

## **The Supply and Demand for Private-Sector Small Business Loans**

Each quarter, the Federal Reserve Board surveys senior loan officers concerning their bank's lending practices. The survey includes a question concerning their bank's credit standards for small business loans: "Over the past three months, how have your bank's credit standards for approving applications for C&I [commercial and industrial] loans or credit lines—other than those to be used to finance mergers and acquisitions—for small firms (annual sales of less than \$50 million) changed?" The senior loan officers are asked to indicate if their bank's credit standards have "Tightened considerably," "Tightened somewhat," "Remained basically unchanged," "Eased somewhat," or "Eased considerably." Subtracting the percentage of respondents reporting "Eased somewhat" and "Eased considerably" from the percentage of respondents reporting "Tightened considerably" and "Tightened somewhat" provides an indication of the market's supply of small business loans.

As shown in **Figure 1**, senior loan officers reported that they tightened small business loan credit standards during the early 2000s; loosened those credit standards in 2004, 2005, and 2006; and tightened them in 2007, 2008, and 2009. Since 2009, business credit markets have improved, and most senior loan officers report that they are no longer tightening their small business lending

---

<sup>11</sup> P.L. 111-322, the Continuing Appropriations and Surface Transportation Extensions Act, 2011.

<sup>12</sup> For example, see H.R. 5851, the Increasing Small Business Lending Act of 2012 (112<sup>th</sup> Congress); and S. 1828, the Increasing Small Business Lending Act of 2011 (112<sup>th</sup> Congress).

<sup>13</sup> P.L. 112-239, the National Defense Authorization Act for Fiscal Year 2013.

standards. However, the Federal Reserve Board notes that those lending standards “remain quite stringent following the prolonged and widespread tightening that took place over the past few years.”<sup>14</sup>

The survey also includes a question concerning the demand for small business loans: “Apart from normal seasonal variation, how has demand for C&I loans changed over the past three months for small firms (annual sales of less than \$50 million)?” Senior loan officers are asked to indicate if demand was “Substantially stronger,” “Moderately stronger,” “About the same,” “Moderately weaker,” or “Substantially weaker.” Subtracting the percentage of respondents reporting “Moderately weaker” and “Substantially weaker” from the percentage of respondents reporting “Substantially stronger” and “Moderately stronger” provides an indication of the market’s demand for small business loans.

As shown in **Figure 1**, senior loan officers reported that the demand for small business loans declined from 2000 to 2004, increased from 2004 to late 2006, declined somewhat in 2007 and 2008, and declined significantly in 2009. Demand then leveled off (at a relatively reduced level) during 2010, increased somewhat during the first half of 2011, declined somewhat during the latter half of 2011, and increased somewhat in 2012.<sup>15</sup>

The combination of decreased supply and demand for small business loans over the past four years has led to a decline in the total amount of outstanding small business debt. Since peaking at \$711.5 billion in the second quarter (June 30) of 2008, the total amount of outstanding, non-agricultural small business debt declined to \$695.2 billion in the second quarter of 2009, \$652.2 billion in the second quarter of 2010, \$607.6 billion in the second quarter of 2011, and \$587.8 billion in the second quarter of 2012.<sup>16</sup> There was \$585.9 billion in outstanding, non-agricultural small business debt at the end of the first quarter (December 31, 2012) of FY2013.<sup>17</sup>

A declining amount of small business outstanding debt does not necessarily mean that the supply of small business loans is declining. However, many, including the SBA, view the decline in small business outstanding debt as a signal that small businesses might be experiencing difficulties in accessing sufficient capital to enable them to lead job growth during the current recovery.

## The Supply and Demand for SBA Loans

**Table 1** shows selected financial statistics for the SBA from FY2000 to FY2012. It provides an overview of the extent of the SBA’s various programs to enhance small business access to capital.

The first two columns report the amount and number of non-disaster small business loans guaranteed by the SBA. The figures reflect loans that were disbursed and are less than the amount and number of loans approved by the SBA. Each year, 7% to 10% of the loans approved by the SBA are subsequently canceled for a variety of reasons, typically by the borrower.

The third column reports the number of bonds guaranteed under the SBA’s surety bond guarantee program.<sup>18</sup> A surety bond is a three-party instrument between a surety (someone who agrees to be responsible for the debt or obligation of another), a contractor, and a project owner. The agreement binds the contractor to comply with the contract’s terms and conditions. If the

<sup>18</sup> For further information and analysis of the SBA’s surety bond guarantee program, see CRS Report R42037, *SBA Surety Bond Guarantee Program*, by Robert Jay Dilger.

contractor is unable to successfully perform the contract, the surety assumes the contractor’s responsibilities and ensures that the project is completed. It is designed to reduce the risk of contracting with small businesses that may not have the credit history or prior experience of larger businesses. The SBA does not issue surety bonds. Instead, it provides and manages surety bond guarantees for qualified small and emerging businesses through its Surety Bond Guarantee (SBG) Program. The SBA reimburses a participating surety (within specified limits) for losses incurred due to a contractor’s default on a bond.<sup>19</sup>

The fourth column reports the outstanding principal balance for the SBA’s 7(a) secondary market guarantee program, which is discussed later in this report. The final column reports the SBA’s outstanding principal balance of loans that have not been charged off as of the end of the fiscal year. It provides a measure of the SBA’s scope of lending.

**Table I. Selected Small Business Administration Financial Statistics, FY2000-FY2012**  
(\$ in millions)

Fiscal Year	SBA Business Loan Guarantees			7(a) Secondary Market Guarantee Program Outstanding Principal	Unpaid Principal Loan Balance <sup>b</sup>
	Amount Disbursed <sup>a</sup>	Number Disbursed	Surety Bond Guarantees Number		
2012	\$18,251	37,981	9,503	\$19,200	\$102,627
2011	\$19,384	50,655	8,638	\$17,600	\$99,201
2010	\$14,813	46,059	8,348	\$15,500	\$93,263
2009	\$12,488	42,157	6,135	\$14,700	\$90,441
2008	\$18,314	69,118	6,055	\$14,900	\$88,244
2007	\$19,105	97,437	5,809	\$14,100	\$84,523
2006	\$18,848	95,027	5,214	\$14,600	\$78,117
2005	\$18,666	92,156	5,678	\$14,900	\$71,495
2004	\$15,384	78,386	7,803	\$14,100	\$64,362
2003	\$13,284	65,055	8,974	\$13,000	\$59,181
2002	\$12,852	49,897	7,372	\$12,000	\$56,219
2001	\$11,246	41,904	6,320	\$11,000	\$53,116
2000	\$12,232	41,514	7,034	\$10,000	\$52,227

**Sources:** U.S. Small Business Administration, correspondence with the author, January 28, 2013 (loan guarantees and unpaid principal loan balance); U.S. Small Business Administration, correspondence with the author, December 11, 2012 (surety bonds); and U.S. Small Business Administration, *Agency Financial Report [various fiscal years] (7(a) secondary market guarantee program outstanding principal)*.

- a. The amount disbursed is the amount provided to the borrower. In recent years, the SBA has guaranteed about 84% to 87% of the loan amount disbursed.

<sup>19</sup> U.S. Small Business Administration, “Surety Bonds,” at <http://www.sba.gov/category/navigation-structure/loans-grants/bonds/surety-bonds>.

- b. Includes unpaid principal loan balance for disaster loans: \$5.8 billion in FY2000, \$4.3 billion in FY2001, \$3.6 billion in FY2002, \$2.9 billion in FY2003, \$3.0 billion in FY2004, \$3.6 billion in FY2005, \$6.8 billion in FY2006, \$9.0 billion in FY2007, \$8.6 billion in FY2008, \$8.4 billion in FY2009, \$7.9 billion in FY2010, \$7.5 billion in FY2011, and \$7.2 billion in FY2012.

As shown in **Table 1**, the amount of non-disaster small business loans disbursed by the SBA declined in FY2008 and FY2009; increased, but remained below pre-recession levels in FY2010; exceeded pre-recession levels in FY2011, and then declined somewhat in FY2012 to \$18.251 billion, just below the \$18.314 billion disbursed in FY2008.<sup>20</sup>

The decline in the amount of small business loans guaranteed by the SBA during FY2008 and FY2009 was, at least in part, due to three interrelated factors. First, many lending institutions become increasingly reluctant to lend to small businesses, even with an SBA loan guarantee. As loan defaults increased due to the recession, earnings fell and an increasing number of lending institutions failed.<sup>21</sup> For example, three lending institutions failed in 2007. That number increased to 26 in 2008 and to 140 in 2009.<sup>22</sup> Included in the list of failed lending institutions in 2009 was CIT Group, Inc., the nation's largest lender to small businesses.<sup>23</sup> When lending institutions anticipate difficulty in making a profit, are losing money, or have diminished expectations of future profits, they tend to become more risk averse and the supply of business loans, including small business loans, tends to decline.

Second, the secondary market for small business loans, as with other secondary markets, began to contract in October 2008, reached its nadir in January 2009, and then began a relatively prolonged recovery.<sup>24</sup> In a secondary market, loans are pooled together and packaged as securities for sale to investors. This practice makes more capital available by allowing lending institutions to remove existing loans from their balance sheets, freeing them to make new loans.<sup>25</sup> When

<sup>20</sup> The recession began in December 2007 and ended in June 2009.

<sup>21</sup> FDIC-insured lending institutions lost \$12.9 billion in 2008, including a \$37.8 billion loss in the fourth quarter, which more than erased \$24.9 billion in profits during the previous three quarters. In 2009, FDIC-insured lending institutions had a net profit of \$4.2 billion. See Federal Deposit Insurance Corporation, "Quarterly Banking Profile: Quarterly Net Income," at <http://www2.fdic.gov/qbp/2009dec/chart1.htm>. In 2010, FDIC-insured lending institutions had \$85.4 billion in net profits. See Federal Deposit Insurance Corporation, "Quarterly Banking Profile: Quarterly Net Income," at <http://www2.fdic.gov/qbp/2010dec/chart1.htm>.

<sup>22</sup> The number of lending institutions which failed increased to 157 in 2010. In 2011, 92 lending institutions failed and in 2012 92 lending institutions failed. See Federal Deposit Insurance Corporation, "Failed Bank List," at <http://www.fdic.gov/bank/individual/failed/banklist.html>.

<sup>23</sup> Patrice Hill, "Lender to small business bankrupt," *The Washington Post*, November 2, 2009, pp. A1, A10. CIT Group, Inc. failed on November 1, 2009.

<sup>24</sup> The Federal Reserve Bank of New York, using authority provided under §13(3) of the Federal Reserve Act, created the Term Asset-Backed Securities Loan Facility (TALF) on March 3, 2009, to stabilize secondary credit markets by lending up to \$200 billion to eligible owners of certain AAA-rated asset backed securities (ABS) backed by newly and recently originated auto loans, credit card loans, student loans, and SBA-guaranteed small business loans. The initial TALF subscription took place on March 19, 2009, and the last one took place in June 2010. There were 23 monthly ABS and Commercial Mortgage Backed Securities (CMBS) subscriptions. TALF supported about \$58 billion of ABS and \$12 billion of CMBS. See Federal Reserve Bank of New York, "Term Asset-Backed Securities Loan Facility: Terms and Conditions," New York, NY, at [http://www.newyorkfed.org/markets/talf\\_terms.html](http://www.newyorkfed.org/markets/talf_terms.html); Federal Reserve Bank of New York, "New York Fed releases revised TALF Master Loan and Security Agreement and appendices," press release, New York, NY, at <http://www.federalreserve.gov/newsevents/press/monetary/20090303a.htm>; and U.S. Department of the Treasury, "Secretary of the Treasury Timothy F. Geithner, Written Testimony Congressional Oversight Panel," press release, June 22, 2010, at <http://cop.senate.gov/documents/testimony-062210-geithner.pdf>.

<sup>25</sup> U.S. Small Business Administration, Office of Advocacy, *An Exploration of a Secondary Market for Small Business Loans*, April 2003, p. 1, at [http://archive.sba.gov/advo/research/rs227\\_tot.pdf](http://archive.sba.gov/advo/research/rs227_tot.pdf).

secondary credit markets constrict, lenders tend to become both less willing and less able to supply small business loans. For example, the secondary market volume for SBA 7(a) loans averaged \$328 million a month from January 2008 through September 2008, and then fell each succeeding month, declining to under \$100 million in January 2009.<sup>26</sup> The SBA estimates that about half of the lenders that make SBA guaranteed loans resell them to obtain additional capital to make additional loans.

Third, the demand for small business loans declined. The SBA estimated that about 60% of the jobs lost in 2008 through the second quarter of 2009 were lost in small firms.<sup>27</sup> Monthly business surveys conducted by Automatic Data Processing, Inc. (ADP) suggest that about 81% of the 7.5 million jobs lost during the recession were in firms with less than 500 employees.<sup>28</sup> When business is slow, or when expectations of business sales growth are diminished, business owners (and entrepreneurs considering starting a new small business) tend to become more risk averse and the demand for small business loans tends to decline.

In 2009, the number and amount of small business loans guaranteed by the SBA declined sharply early in the year, followed by modest increases during the second and third quarters, and briefly surpassed pre-recession levels in the fourth quarter as small business owners took advantage of ARRA funded fee subsidies for the SBA's 7(a) and 504/CDC loan guaranty programs and increase in the 7(a) program's maximum loan guaranty percentage to 90% which were expected to end by the end of the year.<sup>29</sup>

The SBA argued that the increase in the number and amount of small business loans it guaranteed during FY2010 was primarily due to fee subsidies and loan enhancements first put in place under ARRA and later extended by law to cover most of the fiscal year.<sup>30</sup> The SBA noted that its average weekly loan volume for FY2010 (\$333 million) was 29% higher than its average weekly loan volume for FY2009 (\$258 million).<sup>31</sup> Another likely factor contributing to the higher loan volume was a general improvement in the economy as the recession ended (officially in June 2009) and the economic recovery began, albeit slowly in many parts of the nation.

The demand for SBA loans increased significantly during the first quarter of FY2011 (October-December 2010), as borrowers took advantage of SBA fee subsidies that were expected to expire at the end of the calendar year. The SBA announced, on January 3, 2011, that it "approved nearly 22,000 small business loans for \$10.47 billion, supporting a total of \$12.16 billion in lending"

<sup>31</sup> *Ibid.*

during the first quarter of FY2011, which “was the highest volume in a fiscal year’s first quarter than at any time in the agency’s history.”<sup>32</sup> After the fee subsidies ended, SBA lending declined during the second quarter of FY2011, and then increased somewhat during the final two quarters of FY2011. As mentioned previously, the amount of non-disaster small business loans disbursed by the SBA declined somewhat in FY2012 to \$18.251 billion—compared to \$19.384 billion in FY2011.

## Recent Laws Designed to Enhance the Supply of Small Business Loans

As mentioned previously, several laws were enacted during the 110<sup>th</sup> and 111<sup>th</sup> Congresses to enhance small business access to capital. The following laws were enacted largely in response to the contraction of financial credit markets which started in 2008, and reached its nadir in early 2009.

P.L. 110-343, the Emergency Economic Stabilization Act of 2008, was designed to enhance the supply of loans to businesses of all sizes. The act authorized the Troubled Asset Relief Program (TARP) to “restore liquidity and stability to the financial system of the United States” by purchasing or insuring up to \$700 billion in troubled assets from banks and other financial institutions.<sup>33</sup> TARP’s purchase authority was later reduced from \$700 billion to \$475 billion by P.L. 111-203, the Dodd-Frank Wall Street Reform and Consumer Protection Act. The Department of the Treasury has disbursed \$389 billion in TARP funds, including \$337 million to purchase SBA 7(a) loan guaranty program securities.<sup>34</sup> The authority to make new TARP commitments expired on October 3, 2010.

P.L. 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA), included several provisions to enhance the supply of loans to small businesses.<sup>35</sup> ARRA

- authorized the SBA to establish a temporary secondary market guarantee authority to provide a federal guarantee for pools of first lien 504/CDC program

<sup>32</sup> U.S. Small Business Administration, “Jobs Act Supported More Than \$12 Billion in SBA Lending to Small Businesses in Just Three Months,” January 3, 2011, at <http://www.sba.gov/content/jobs-act-supported-more-12-billion-sba-lending-small-businesses-just-three-months>.

<sup>33</sup> For further analysis, see CRS Report R41427, *Troubled Asset Relief Program (TARP): Implementation and Status*, by Baird Webel.

<sup>34</sup> U.S. Department of the Treasury, *Troubled Assets Relief Program Monthly 105(a) Report—November 2010*, December 10, 2010, pp. 2-4, at [http://www.financialstability.gov/docs/November%20105\(a\)%20FINAL.pdf](http://www.financialstability.gov/docs/November%20105(a)%20FINAL.pdf). On March 16, 2009, President Obama announced that the Department of the Treasury would use TARP funds to purchase up to \$15 billion of SBA-guaranteed loans to “immediately unfreeze the secondary market for SBA loans and increase the liquidity of community banks.” The plan was deferred after it met resistance from lenders. Some lenders objected to TARP’s requirement that participating lenders comply with executive compensation limits and issue warrants to the federal government. Smaller, community banks objected to the program’s paperwork requirements, such as the provision of a small-business lending plan and quarterly reports. See The White House, “Remarks by the President to Small Business Owners, Community Leaders, and Members of Congress,” March 16, 2009, at [http://www.whitehouse.gov/the\\_press\\_office/Remarks-by-the-President-to-small-business-owners/](http://www.whitehouse.gov/the_press_office/Remarks-by-the-President-to-small-business-owners/).

<sup>35</sup> For further analysis, see CRS Report R40728, *Small Business Tax Benefits and the American Recovery and Reinvestment Act of 2009*, by Gary Guenther and CRS Report R41385, *Small Business Legislation During the 111<sup>th</sup> Congress*, by Robert Jay Dilger and Gary Guenther.

loans that are to be sold to third-party investors. The SBA was granted emergency rulemaking authority to issue regulations for the program within 15 days after enactment (by March 4, 2009). After experiencing unanticipated delays in implementing the program due to “limited staff resources” and determining how to meet ARRA reporting requirements, the SBA issued regulations for its 504/CDC First Mortgage Loan Pooling program on October 30, 2009, and it became operational in June 2010.<sup>36</sup> The program was scheduled to end on February 16, 2011, or until \$3 billion in new pools are created, whichever occurred first. As will be discussed, the Small Business Jobs Act of 2010 extended the program.<sup>37</sup>

- authorized the SBA to use emergency rulemaking authority to issue regulations within 30 days after enactment (by March 19, 2009), to make below market interest rate direct loans to SBA-designated “Systemically Important Secondary Market (SISM) Broker-Dealers.” These broker-dealers would use the loan funds to purchase SBA-guaranteed loans from commercial lenders, assemble them into pools, and sell them to investors in the secondary loan market. The SBA experienced unanticipated delays in implementing the program primarily due to the need to determine “the extent to which broker-dealers, and perhaps small business lenders, would be required to share in the potential losses associated with extending the guarantee in the 504 loan program.”<sup>38</sup> The SBA issued regulations to establish the Direct Loan Program for Systemically Important Secondary Market Broker-Dealers on November 19, 2009.<sup>39</sup>
- provided \$255 million for a temporary, two-year small business stabilization program to guarantee loans of \$35,000 or less to small businesses for qualified debt consolidation, later named the America’s Recovery Capital (ARC) Loan program (the program ceased issuing new loan guarantees on September 30, 2010); \$15 million for the SBA’s surety bond program, and temporarily increased the maximum bond amount from \$2 million to \$5 million, and up to \$10 million under certain conditions (the higher maximum bond amounts ended on September 30, 2010); \$6 million for the SBA’s Microloan program’s lending program and \$24 million for the Microloan program’s technical assistance program; and increased the funds (“leverage”) available to SBA-licensed Small Business Investment Companies (SBICs) to no more than 300% of the company’s private capital or \$150,000,000, whichever is less.

<sup>39</sup> U.S. Small Business Administration, “American Recovery and Reinvestment Act: Loan Program for Systemically Important SBA Secondary Market Broker-Dealers,” *74 Federal Register* 59891, November 19, 2009.

- authorized the SBA to guarantee 504/CDC loans used to refinance business expansion projects as long as the existing indebtedness did not exceed 50% of the project cost of the expansion and the borrower met specified requirements.

P.L. 111-240, the Small Business Jobs Act of 2010, was enacted after the financial credit markets had stabilized. It included several provisions designed to enhance the supply of loans to small businesses. For example, the act

- authorized the Secretary of the Treasury to establish a \$30 billion Small Business Lending Fund (SBLF) to encourage community banks to provide small business loans (\$4 billion was issued) and a \$1.5 billion State Small Business Credit Initiative (SSBCI) to provide funding to participating states with small business capital access programs.<sup>40</sup>
- extended the SBA's secondary market guarantee authority from two years after the date of ARRA's enactment to two years after the date of the program's first sale of a pool of first lien position 504/CDC loans to a third-party investor (which took place on September 24, 2010).<sup>41</sup>
- authorized \$22.5 million for a temporary, three-year Small Business Intermediary Lending Pilot Program to provide direct loans to intermediaries which provide loans to small business startups, newly established small businesses, and growing small businesses. On August 4, 2011, the SBA announced the first 20 community lenders which were selected to participate in the program.<sup>42</sup>
- authorized \$15 million in additional funding for the SBA's 7(a) loan guaranty program.
- increased the loan guarantee limits for the SBA's 7(a) program from \$2 million to \$5 million, and for the 504/CDC program from \$1.5 million to \$5 million for "regular" borrowers, from \$2 million to \$5 million if the loan proceeds are directed toward one or more specified public policy goals, and from \$4 million to \$5.5 million for manufacturers.
- increased the SBA's Microloan program's loan limit for borrowers from \$35,000 to \$50,000 and for microlender intermediaries after their first year in the program from \$3.5 million to \$5 million.<sup>43</sup>

<sup>42</sup> U.S. Small Business Administration, "Small Businesses Have New Non-Profit Sources for SBA-financed Loans," August 4, 2011, at <http://www.sba.gov/content/intermediary-lending-pilot-program-0>.

<sup>43</sup> The act also temporarily allowed the SBA to waive, in whole or in part, for successive fiscal years, the non-federal share requirement for loans to the Microloan program's intermediaries and for grants made to Microloan intermediaries for small business marketing, management, and technical assistance under specified circumstances (e.g., the economic conditions affecting the intermediary). See P.L. 111-240, the Small Business Jobs Act of 2010, §1401. Matching Requirements Under Small Business Programs.

- temporarily increased for one year the SBA 7(a) Express Program's loan limit from \$350,000 to \$1 million (the temporary increase expired on September 26, 2011).
- required the SBA to establish an on-line lending platform listing all SBA lenders and information concerning their loan rates.
- authorized the SBA to temporarily guarantee for two years, under specified circumstances, 504/CDC loans that refinance existing business debt even if the project does not involve the expansion of the business.

For additional details concerning provisions in the Small Business Jobs Act of 2010, see **Table A-1** in the **Appendix**.

## **Recent Laws Designed to Enhance the Demand for Small Business Loans**

ARRA provided the SBA \$375 million to subsidize fees for the SBA's 7(a) and 504/CDC loan guaranty programs and to increase the 7(a) program's maximum loan guaranty percentage from up to 85% of loans of \$150,000 or less and up to 75% of loans exceeding \$150,000 to 90% for all regular 7(a) loans through September 30, 2010, or when appropriated funding for the subsidies and loan modification was exhausted. The fee subsidies were designed to increase the demand for SBA loans by reducing loan costs.

ARRA's funding for the fee subsidies and 90% maximum loan guaranty percentage was about to be exhausted in November 2009, when Congress passed the first of six laws to extend the loan subsidies and 90% maximum loan guaranty percentage:

- P.L. 111-118, the Department of Defense Appropriations Act, 2010, provided the SBA \$125 million to continue the fee subsidies and 90% maximum loan guaranty percentage through February 28, 2010.
- P.L. 111-144, the Temporary Extension Act of 2010, provided the SBA \$60 million to continue the fee subsidies and 90% maximum loan guaranty percentage through March 28, 2010.
- P.L. 111-150, an act to extend the Small Business Loan Guarantee Program, and for other purposes, provided the SBA authority to reprogram \$40 million in previously appropriated funds to continue the fee subsidies and 90% maximum loan guaranty percentage through April 30, 2010.
- P.L. 111-157, the Continuing Extension Act of 2010, provided the SBA \$80 million to continue the SBA's fee subsidies and 90% maximum loan guaranty percentage through May 31, 2010.
- P.L. 111-240, the Small Business Jobs Act of 2010, provided \$505 million (plus an additional \$5 million for administrative expenses) to continue the SBA's fee subsidies and 90% maximum loan guaranty percentage from the act's date of enactment (September 27, 2010) through December 31, 2010.
- P.L. 111-322, the Continuing Appropriations and Surface Transportation Extensions Act, 2011, authorizes the SBA to use funds provided under the Small

Business Jobs Act of 2010 to continue the SBA's fee subsidies and 90% maximum loan guaranty percentage through March 4, 2011, or until available funding is exhausted.

On January 3, 2011, the SBA announced that funding for the fee subsidies and 90% maximum loan guaranty percentage had been exhausted.<sup>44</sup>

ARRA also included 11 tax relief provisions that have the potential to benefit small businesses in a broad range of industries.<sup>45</sup> By reducing costs, it could be argued that providing tax relief for small businesses may lead to increased demand for small business loans because small business owners have additional resources available to invest in their business. The following five ARRA tax provisions provided about \$5.7 billion in tax relief and were targeted at small businesses, whereas the other ARRA tax provisions were available to businesses of all sizes:

- allowed businesses with \$15 million or less in average annual gross receipts in the past three years to carry back net operating losses from 2008 for up to five years instead of two years.
- extended through 2009 the enhanced expensing allowance, which allows businesses to deduct up to \$250,000 of the cost of eligible assets placed in service in 2009, within certain limits.
- increased the exclusion of the gain on the sale of small business stock to 75% (instead of 50%) of any gain realized on the sale of eligible small business stock acquired between February 18, 2009, and December 31, 2010.
- reduced the recognition period from 10 years to seven years for corporate tax on sale of appreciated assets in 2009 or 2010 by S corporations that once were organized as C corporations.
- allowed individuals who had an adjusted gross income in 2008 of less than \$500,000 and can prove that over half their income came from a small business to base their estimated tax payments for 2009 on 90% of their tax liability for 2008.

The Small Business Jobs Act of 2010 was designed to increase the demand for SBA loans by providing \$505 million (plus an additional \$5 million for related administrative expenses) to temporarily subsidize SBA's fees and increase the 7(a) program's maximum loan guaranty percentage to 90%. The act also required the SBA to establish an alternative size standard for the SBA's 7(a) and 504/CDC loan guaranty programs that uses maximum net worth and average net income as an alternative to the use of industry standards. It also established the following interim alternative size standard for both the 7(a) and 504/CDC programs: the business qualifies as small if it does not have a tangible net worth in excess of \$15 million and does not have an average net income after federal taxes (excluding any carry-over losses) in excess of \$5 million for two full fiscal years before the date of application. These changes were designed to increase the demand

---

<sup>44</sup> U.S. Small Business Administration, "Jobs Act Supported More Than \$12 Billion in SBA Lending to Small Businesses in Just Three Months," January 3, 2011, at <http://www.sba.gov/content/jobs-act-supported-more-12-billion-sba-lending-small-businesses-just-three-months>.

<sup>45</sup> For further analysis see CRS Report R40728, *Small Business Tax Benefits and the American Recovery and Reinvestment Act of 2009*, by Gary Guenther.

for small business loans by increasing the number of small businesses that are eligible for SBA assistance.<sup>46</sup>

The Small Business Jobs Act of 2010 also provided small businesses with about \$12 billion in tax relief. The act

- raised the exclusion of gains on the sale or exchange of qualified small business stock from the federal income tax to 100%, with the full exclusion applying only to stock acquired the day after the date of enactment through the end of 2010;
- increased the deduction for qualified start-up expenditures from \$5,000 to \$10,000 in 2010, and raised the phaseout threshold from \$50,000 to \$60,000 for 2010;
- placed limitations on the penalty for failure to disclose reportable transactions based on resulting tax benefits;
- allowed general business credits of eligible small businesses for 2010 to be carried back five years;
- exempted general business credits of eligible small businesses in 2010 from the alternative minimum tax;
- allowed a temporary reduction in the recognition period for built-in gains tax;
- increased expensing limitations for 2010 and 2011 and allows certain real property to be treated as Section 179 property;
- allowed additional first-year depreciation for 50% of the basis of certain qualified property; and
- removed cellular telephones and similar telecommunications equipment from listed property so their cost can be deducted or depreciated like other business property.<sup>47</sup>

## Discussion

As mentioned previously, congressional interest in the SBA's access to capital programs has increased in recent years, primarily because assisting small business in accessing capital is viewed as a means to enhance job creation and economic growth. Some, including President Obama, have argued that the SBA should be provided additional resources to assist small businesses in acquiring capital necessary to start, continue, or expand operations and create jobs.<sup>48</sup> Others worry about the long-term adverse economic effects of spending programs that

<sup>48</sup> Rep. Nydia Velázquez, "Small Business Financing and Investment Act of 2009," House debate, *Congressional Record*, daily edition, vol. 155, no. 159 (October 29, 2009), pp. H12074, H12075; Sen. Mary Landrieu, "Statements on Introduced Bills and Joint Resolutions," remarks in the Senate, *Congressional Record*, daily edition, vol. 155, no. 185 (December 10, 2009), p. S12910; and The White House, "Remarks by the President on Job Creation and Economic Growth," December 8, 2009, at <http://www.whitehouse.gov/the-press-office/remarks-president-job-creation-and-> (continued...)

increase the federal deficit. They also point to surveys of small business firms conducted by the National Federation of Independent Business (NFIB) which suggest that small business owners consistently place financing issues near the bottom of their most pressing concerns.<sup>49</sup> Instead of increasing federal funding for the SBA, they advocate small business tax reduction, reform of financial credit market regulation, and federal fiscal restraint as the best means to assist small business and foster increased levels of economic growth and job creation.<sup>50</sup>

Some advocates of providing additional resources to the SBA have argued that the federal government should enhance small business access to capital by creating a SBA direct lending program for small businesses.<sup>51</sup> During the 111<sup>th</sup> Congress, H.R. 3854, the Small Business Financing and Investment Act of 2009, was passed by the House on October 29, 2009, by a vote of 389-32. It would have authorized a temporary SBA direct lending program.<sup>52</sup> Also, during the 112<sup>th</sup> Congress, H.R. 3007, the Give Credit to Main Street Act of 2011, introduced on September 21, 2011, and referred to the House Committee on Small Business, would have authorized the SBA to provide direct loans to small businesses that have been in operation as a small business for at least two years prior to its application for a direct loan. The maximum loan amount would have been the lesser of 10% of the firm's annual revenues or \$500,000. Also, H.R. 5835, the Veterans Access to Capital Act of 2012, introduced on May 18, 2012, and referred to the House Committee on Small Business, would have authorized the SBA to provide up to 20% of the annual amount available for guaranteed loans under the 7(a) and 504/CDC loan guaranty programs, respectively, in direct loans to veteran-owned and -controlled small businesses.

The SBA currently has authority to make direct loans to small businesses, but, with the exception of disaster loans, has not exercised that authority since 1994.<sup>53</sup> Advocates for a small business direct lending program have argued that such a program would provide "rapid access to much-needed capital without having to face the administrative delays posed by the current Small Business Administration lending process."<sup>54</sup> Advocates of a temporary SBA direct lending program argued that such a program was necessary during periods of economic difficulty because

In prosperous times, small businesses are able to shop around to different lenders to find the best available terms and conditions for a loan. But in times of economic downturns, those same lenders aren't as willing to lend to small businesses. More than ever during these times, it's the government's responsibility to step in to help small businesses access the loans they need to keep their businesses running and workers employed.<sup>55</sup>

Opponents of a small business direct lending program argue that the SBA's mission is to augment the private sector by guaranteeing loans, not compete with it by providing direct loans to small businesses.<sup>56</sup> They also argue that these loans hold greater risk than most; otherwise the private sector would accept them. They worry that SBA defaults may increase, resulting in added expense, either to taxpayers in the form of additional appropriations or to other small business borrowers in the form of higher fees, to cover the defaults.<sup>57</sup> They argue that the SBA stopped offering direct loans in 1995, primarily because the subsidy rate was "10 to 15 times higher than that of our guaranty programs."<sup>58</sup> They also assert that providing direct loans to small businesses might invite corruption. They note that the Reconstruction Finance Corporation (RFC), the SBA's predecessor, made direct loans to business and was accused of awarding loans based on the applicant's political connections or personal ties with RFC loan officers.<sup>59</sup> Opponents also argue that the SBA does not have the human, physical, and technical resources to make direct loans.

Still others argue that providing additional funding for SBA programs is largely a symbolic gesture because the SBA's guaranteed loan programs account for a relatively small fraction of small business lending.<sup>60</sup> They argue that, in a typical year, no more than 1% of small businesses receive an SBA-guaranteed loan, and those loans account for less than 3% or 4% of the total amount loaned to small businesses.<sup>61</sup> They assert that "these numbers show that the private

banking system finances most loans and that the SBA is therefore largely irrelevant in the capital market.<sup>62</sup>

## **SBA Funding**

As mentioned previously, some, including President Obama, have argued that the SBA should be provided additional resources to assist small businesses in acquiring capital necessary to start, continue, or expand operations and create jobs. Others worry about the long-term adverse economic effects of spending programs that increase the federal deficit. They advocate fiscal restraint as the best means to assist small business and foster increased levels of economic growth and job creation.

Both of these views have been reflected in recent SBA budget discussions as Congress has focused on ways to reduce the SBA's budget while not compromising the SBA's ability to assist small businesses access capital and assist individuals and businesses of all sizes cope with damages caused by natural disasters. As shown in **Table 2**, the SBA's FY2013 appropriation, after taking into account sequestration and a required 0.2% funding reduction under P.L. 113-6, the Consolidated and Further Continuing Appropriations Act, 2013, is \$1,754.5 million, an increase of \$835.7 million over its FY2012 appropriation of \$918.8 million.

Although the SBA's overall budget authority nearly doubled from FY2012 to FY2013, after taking into account increased funding for the SBA's disaster loan programs and business loan subsidy costs, the SBA's FY2013 appropriation for all other programs (\$583.6 million) is \$7.1 million less than its FY2012 appropriation for all other programs (\$590.7 million), and \$17.9 million less than its FY2011 appropriation for all other programs (\$601.5 million).

As shown in **Table 2**, the Obama Administration has requested that the SBA be provided \$968.8 million in FY2014. The Administration requested \$191.9 million for the SBA's disaster loan programs, \$111.6 million for business loan credit subsidies, and \$665.3 million for all other SBA programs (\$485.9 million for salaries and expenses, including \$210.3 million for non-credit programs, such as SCORE, Small Business Development Centers, and Women Business Centers; \$151.6 million for administrative expenses related to the SBA's business loan programs; and \$27.8 million for all other SBA programs).<sup>63</sup>

**Sources:** U.S. Small Business Administration, Congressional Budget Justification, various years, at <http://www.sba.gov/about-sba-services/217>; P.L. 112-10, the Department of Defense and Full-Year Continuing Appropriations Act, 2011; P.L. 112-74, the Consolidated Appropriations Act, 2012, P.L. 112-175, the Continuing Appropriations Resolution, 2013; P.L. 113-2, the Disaster Relief Appropriations Act, 2013; P.L. 113-6, the Consolidated and Further Continuing Appropriations Act, 2013 and U.S. Office of Management and Budget, *OMB Final Sequestration Report to the President and Congress for Fiscal Year 2013*,

- Prior to sequestration and an across-the-board 0.2% funding reduction, funding for FY2013 was \$896.3 million for disaster assistance, \$337.3 million for business loan credit subsidies, \$615.7 million for other programs, and \$1,849.3 million for total funding.
- The SBA's FY2011 appropriation of \$731,201,000 (\$45.5 million for SBA disaster assistance and \$685.7 million for other SBA programs) was reduced to \$729,738,000 by a 0.2% across-the-board rescission imposed on most appropriations accounts by P.L. 112-10, the Department of Defense and Full-Year Continuing Appropriations Act, 2011.
- \$775.0 million in temporary funding for 7(a) and 504/CDC loan guaranty program fee subsidies and loan modifications, and \$187.5 million for other SBA programs. P.L. 111-118, the Department of Defense Appropriations Act, 2010, provided \$125 million, P.L. 111-144, the Temporary Extension Act of 2010, provided \$60 million, P.L. 111-157, the Continuing Extension Act of 2010, provided \$80 million, and P.L. 111-240, the Small Business Jobs and Credit Act of 2010, provided \$510 million to provide temporary fee subsidies for the SBA's 7(a) and 504/CDC loan guaranty programs and to temporarily increase the 7(a) program's maximum loan guaranty percentage to 90%. P.L. 111-240 extended the subsidies and 90% loan guaranty through December 31, 2010, and provides \$187.5 million for other SBA programs that are to remain available through FY2011. Also, P.L. 111-150, to permit the use of previously appropriated funds to

- extend the Small Business Loan Guarantee Program, authorized the SBA to use \$40 million in previously appropriated funds for fee subsidies and the 7(a) loan modification.
- d. SBA disaster assistance funding in FY2009 was carried over from the previous fiscal year.
  - e. P.L. 111-5, the American Recovery and Reinvestment Act of 2009, provided \$730 million for SBA programs, including \$375 million for loan subsidies and loan modifications for the 7(a) and 504/CDC programs and \$255 million for a new, temporary small business stabilization program, later named the America's Recovery Capital (ARC) Loan program.

## Concluding Observations

Congress approved many changes during the 111<sup>th</sup> Congress to enhance small business access to capital. For example, P.L. 111-240, the Small Business Jobs Act of 2010, authorized the Secretary of the Treasury to establish a \$30 billion Small Business Lending Fund (SBLF) to make capital investments in eligible community banks with total assets equal to or less than \$1 billion or \$10 billion (\$4 billion was issued).<sup>64</sup> It authorized a \$1.5 billion State Small Business Credit Initiative Program to be administered by the Department of the Treasury.<sup>65</sup> It made numerous changes to SBA programs in an attempt to make them more accessible to small businesses, such as increasing maximum loan amounts, creating an alternative size standard so more businesses can qualify for assistance, waiving some matching requirements, and temporarily expanding refinancing options under the 504/CDC program. It provided funding to extend SBA fee subsidies and the 7(a) program's 90% maximum loan guaranty percentage, made several changes to federal contracting law to increase small business opportunities in federal contracting, and provided about \$12 billion in tax relief for small businesses. In addition, Congress approved legislation to temporarily reduce, for calendar years 2011 and 2012, payroll taxes by two percentage points for workers (including self-employed small business owners) who pay into Social Security.<sup>66</sup> The NFIB has long advocated a reduction of federal payroll taxes as a means to reduce small business expenses.<sup>67</sup>

During the 112<sup>th</sup> Congress, many bills were introduced to enhance small business access to capital, including bills to extend the SBA's temporary fee subsidies and increase the 7(a) program's loan guaranty percentage to 90%.<sup>68</sup> Congress did not adopt legislation that directly affected the SBA's access to capital programs. Instead, it passed legislation designed to enhance small business contracting opportunities, expand access to the SBA's surety bond guarantee program, amend the SBA's size standard practices, require a review and reassessment of the

<sup>68</sup> For example, see H.R. 5851, the Increasing Small Business Lending Act of 2012 (112<sup>th</sup> Congress); and S. 1828, the Increasing Small Business Lending Act of 2011 (112<sup>th</sup> Congress).

federal procurement small business goaling program, and expand small business mentor-protégé programs.<sup>69</sup>

The question before the 113<sup>th</sup> Congress is what, if any, additional action should the federal government take to enhance small business access to capital? Should Congress decide to take further action, three not necessarily mutually exclusive options are readily apparent.

First, Congress could adopt a wait-and-see strategy that focuses on congressional oversight of the programmatic changes to the SBA's programs that were enacted during the 111<sup>th</sup> and 112<sup>th</sup> Congresses. Advocates of this approach could argue that small business credit markets have generally improved over the past two years, the SBA's lending has stabilized at pre-recession levels, and the demand for small business loans is increasing. Therefore, it could be argued that evaluating the impact of the programmatic changes to the SBA's programs that were enacted during the past two Congresses, especially given that economic conditions appear to be improving, should take place before taking further congressional action to improve small business access to capital.

Second, Congress could consider additional changes to the SBA's programs in an effort to enhance small business access to capital, such as considering a direct lending program, providing additional funding for SBA fee subsidies and loan modifications, or increasing funding for SBA programs. For example, during the 111<sup>th</sup> Congress, S. 3967, the Small Business Investment and Innovation Act of 2010, would have authorized funding increases for the SBA's training and technical assistance programs, established a Rural Small Business Technology Pilot Program, increased maximum loan limits for the SBA's home and business disaster loan programs, increased surety bond limits, and expanded eligibility for the SBA's State Trade and Export Promotion Grant Program to cities and other major metropolitan areas. Advocates of this approach could argue that although small business credit markets have generally improved over the past two years, as the Federal Reserve has asserted, those markets "remain quite stringent following the prolonged and widespread tightening that took place [in 2008 and 2009]."<sup>70</sup>

Third, Congress could consider the repeal of portions of the Small Business Jobs Act of 2010, or other SBA programs. For example, on March 15, 2011, the House Committee on Small Business approved its views and estimates for the concurrent resolution on the budget for FY2012. The committee recommended that the SBA's budget be "cut nearly \$100 million."<sup>71</sup> The committee recommended that 14 programs, including several management and technical assistance training programs, be defunded "because they duplicate existing programs at the SBA or at other agencies" or "where there is an absence of any evidence that they will help small businesses create new jobs."<sup>72</sup> In its views and estimates letter for the FY2013 budget, the House Committee

<sup>72</sup> *Ibid.* For further information concerning the funding recommendations contained in the House Committee on Small Business views and estimates for the concurrent resolution on the budget for FY2012 see U.S. Congress, House Committee on Small Business, "Views and Estimates of the Committee on Small Business on Matters to be set forth in the Concurrent Resolution on the Budget for FY2012, communication to the Chairman, House Committee on the Budget," 112<sup>th</sup> Cong., 1<sup>st</sup> sess., March 17, 2011, at [http://smbiz.house.gov/UploadedFiles/March\\_17\\_VIEWS\\_and\\_Estimates\\_Letter.pdf](http://smbiz.house.gov/UploadedFiles/March_17_VIEWS_and_Estimates_Letter.pdf).

on Small Business recommended, on March 7, 2012, that funding be reduced for several SBA programs, including funding for 7(j) technical assistance, microloan technical assistance, and the National Women’s Business Council. It also recommended that funding be eliminated for Women’s Business Centers, Veterans Business Centers, Prime Technical Assistance, HUBZone outreach, the Office of Native American Affairs, and the Office of International Trade. It also recommended that funding be eliminated for several SBA initiatives, including the Drug-Free Workplace, Clusters, and National Veterans Entrepreneurial Training Program.<sup>73</sup>

Advocates of this option argue that instead of increasing federal funding for the SBA, the federal government should focus on small business tax reduction and federal fiscal restraint as the best means to assist small business and foster increased levels of economic growth and job creation.<sup>74</sup>

## Appendix. Selected Provisions in the Small Business Jobs Act of 2010

**Table A-1. Selected Provisions, the Small Business Jobs Act of 2010**

Issue/Program	The Small Business Jobs Act of 2010
SBA 7(a) Program	increased the 7(a) Program's loan limit from \$2 million to \$5 million.
SBA 504 Program	increased the 504/CDC Program's loan limits from \$1.5 million to \$5 million for "regular" borrowers, from \$2 million to \$5 million if the loan proceeds are directed toward one or more specified public policy goals, and from \$4 million to \$5.5 million for manufacturers; and temporarily expanded for two years the eligibility for low-interest refinancing under the SBA's 504/CDC program for qualified debt.
SBA Express Program	temporarily increased for one year the Express Program's loan limit from \$350,000 to \$1 million (expired on September 26, 2011).
SBA Microloan Program	increased the Microloan Program's loan limit for borrowers from \$35,000 to \$50,000; and increased the loan limits for Microloan intermediaries after their first year in the program from \$3.5 million to \$5 million.
Temporary SBA fee subsidies and loan modifications	temporarily increased the SBA's guaranty on 7(a) loans to 90% and provided for the elimination of selected fees on the SBA's 7(a) and 504 loans through December 31, 2010.
SBA secondary market	extended the SBA's secondary market lending authority under ARRA from 2 years from enactment to 2 years from the first sale of a pool of first lien position 504 loans guaranteed under this authority investor (which took place on September 24, 2010).
SBA size standards	authorized the SBA to establish an alternative size standard for the SBA's 7(a) and 504 programs that would use maximum tangible net worth and average net income; and to established an interim alternative size standard of not more than \$15 million in tangible net worth and not more than \$2 million in average net income for the two full fiscal years before the date of the application.
SBA International Trade Finance Program	increased the International Trade Finance Program's loan limit from \$1.75 million, of which not more than \$1.25 million may be used for working capital, supplies, or financings, to \$4.5 million.
State Trade and Export Promotion Grant Program	established an associate administrator for the SBA's Office of International Trade and a state trade and export promotion grant program.

<b>Issue/Program</b>	<b>The Small Business Jobs Act of 2010</b>
Federal contracting	<p>imposed contract bundling accountability measures directing federal agencies to include in each solicitation for any contract award above the agency's substantial bundling threshold a provision soliciting bids by small business teams and joint ventures;</p> <p>required federal agencies to publish on its website its policy on contract bundling and consolidation, as well as a rationale for any bundled contract solicited or awarded;</p> <p>repealed the small business competitiveness demonstration program; and</p> <p>provided parity among the small business contracting programs (including striking "shall" and inserting "may" in 15 U.S.C. 657a(b)(2)(B), which refers to the agency's discretion to provide contracting preference to HUBZone small businesses).</p>
Small Business Lending Fund	<p>authorized the U.S. Treasury to make up to \$30 billion of capital investments (\$4 billion was issued);</p> <p>CBO estimated the program would raise \$1.1 billion over 10 years.</p>
State Small Business Credit Initiative Program	<p>authorized \$1.5 billion for the State Small Business Credit Initiative Program.</p>
SBA Intermediary Lending Pilot Program	<p>authorized a three-year Intermediary Lending Pilot Program to allow the SBA to make direct loans to not more than 20 eligible nonprofit lending intermediaries each year totaling not more than \$20 million. The intermediaries, in turn, would be allowed to make loans to new or growing small businesses, not to exceed \$200,000 per business.</p>
Capital gains taxation	<p>temporarily raised to 100% the exclusion of gains on certain small business stock from enactment to end of calendar year.</p>
Limitation on penalties for failure to disclose reportable transactions	<p>placed limitations on the penalty for failure to disclose reportable transactions based on resulting tax benefits.</p>
Deduction for start-up expenditures	<p>increased the deduction for qualified start-up expenditures from \$5,000 to \$10,000 in 2010, and the phaseout threshold from \$50,000 to \$60,000 for 2010.</p>
Business carry back	<p>allowed general business credits of eligible small businesses for 2010 to be carried back 5 years.</p>
Alternative Minimum Tax	<p>exempted general business credits of eligible small businesses in 2010 from the alternative minimum tax.</p>
Recognition period for built-in gains tax	<p>allowed a temporary reduction in the recognition period for built-in gains tax.</p>
Expensing and Section 179 property	<p>increased expensing limitations for 2010 and 2011; and allowed certain real property to be treated as Section 179 property.</p>
Depreciation	<p>allowed additional first-year depreciation for 50% of the basis of certain qualified property.</p>
Deduction for health insurance costs	<p>allowed the deduction for health insurance costs in computing self-employment taxes in 2010.</p>

---

<b>Issue/Program</b>	<b>The Small Business Jobs Act of 2010</b>
Deduction for cellular telephones	removed cellular telephones and similar telecommunications equipment from listed property so their cost can be deducted or depreciated like other business property.
Crude tall oil	made crude tall oil ineligible for the cellulosic biofuel producer credit.
Section 561 of the Hiring Incentives to Restore Employment Act	increased the percentage under Section 561 of the Hiring Incentives to Restore Employment Act by 36 percentage points.
Rental income reporting	required taxpayers that receive rental income from leasing real property to file information returns to the IRS and to service providers that report receiving payments of \$600 or more during the tax year for rental property expenses (repealed by P.L. 112-9, the Comprehensive 1099 Taxpayer Protection and Repayment of Exchange Subsidy Overpayments Act of 2011).
Penalties for failing to file information returns to the IRS	increased the penalties for failing to file information returns to the IRS and to payees in a timely manner.
Treasury Department authority to apply a continuous levy on federal contractors	expanded the Treasury Department's authority to apply a continuous levy to government payments to federal contractors that owe the IRS for unpaid taxes to include payments for property such as a new office building. Current law allows the levy to be applied to payments for goods and services only.
Predictive modeling to identify Medicaid waste, fraud, and abuse	authorized the use of predictive modeling to identify and prevent waste, fraud, and abuse in the Medicare fee-for-service program.
Roth Retirement Accounts	allowed participants in government Section 457 plans to treat elective deferrals as Roth contributions; and  allowed rollovers from elective deferral plans to designated Roth accounts.
Nonqualified annuities	allowed holders of nonqualified annuities (i.e., annuity contracts held outside of a tax-qualified retirement plan or IRA) to elect to receive a portion of the contract in the form of a stream of annuity contracts, leaving the remainder of the contract to accumulate income on a tax-deferred basis.
