What are the Top Cultural Characteristics That Appear in High-Performing Organizations Across Multiple Industries?

Abstract

Recently, researchers have investigated the existence of High Performing Organization (HPO) and its characteristics. Because researchers approach the topic of high performance from different backgrounds and angles and with different goals, it makes sense there is not yet a consistent definition of a HPO. We found a meaningful research paper that identifies common characteristics or common themes that seemed to be part of a HPO. This report will cover definitions and cultural characteristics of HPO based on that research paper contrasting and combining results from 91 different quality studies done over the last fifteen years.

Keywords

human resources, high performing firm, cultural characteristics, multiple industries

Question

What are the top cultural characteristics that appear in high-performing organizations across multiple industries?

Introduction: Various researches done about High-Performing Organization.

Recently, researchers have investigated the existence of High Performing Organization (HPO) and its characteristics. Because researchers approach the topic of high performance from different backgrounds and angles and with different goals, it makes sense there is not yet a consistent definition of a HPO. We found a meaningful research paper that identifies common characteristics or common themes that seemed to be part of a HPO. This report will cover definitions and cultural characteristics of HPO based on that research paper contrasting and combining results from 91 different quality studies done over the last fifteen years.

Analysis: Definition and cultural characteristics of High Performing Organization

There were 3 criteria for including studies in the research were:

1. The study has been performed in the last or present decade (no earlier than 1990) and aimed specifically at identifying HPO-characteristics
2. The study consists of either a survey with a sufficient large number of respondents so that its results can be assumed to be representative. The study preferably contains more than one industry in more than one country.
3. The written documentation contains an account and justification of the research method, research approach and selection of the research population, a clear analysis, and clear retraceable conclusions and results.

Based on the described criteria, the literature search yielded 91 studies which satisfied the criteria completely or partly (Exhibit 1). The researcher identified common themes in the definitions given in the studies listed in Exhibit 1, and composed a definition based on these common themes.

Definition of high-performing organizations (HPO):

A High Performance Organization is an organization that achieves results that are better than those of its peer group over a longer period of time¹, by being able to adapt well to changes² and react on these quickly, by managing for the long term, by setting up an integrated and aligned management structure³, by continuously improving its core capabilities⁴, and by truly treating the employees as its main asset.

Based upon the research analysis of “Characteristics of high performance organizations”, we have concluded that the following six characteristics as a cultural traits of HPO.

¹ Collins and Porras, 1997; Geus, 1997; Brown and Eisenhardt, 1998; Hodgetts, 1998; Mische, 2001; Weick and Sutcliffe, 2001; Zook and Allen, 2001; Annunzio, 2004; Bruch and Ghoshal, 2004; Van den Berg and De Vries, 2004

² Kotter and Heskett, 1992; Brown and Eisenhardt, 1998; Goranson, 1999; Quinn et al., 2000; Foster and Kaplan, 2001; Weick and Sutcliffe, 2001; Hamel and Valikangas, 2003; Annunzio, 2004; Light, 2005

³ Hodgetts, 1998; Lawler et al., 1998; Kirkman et al., 1999; Lee et. al., 1999; O'Reilly and Pfeffer, 2000

⁴ Kling, 1995; Lawler et al., 1998; Garratt, 2000; O'Reilly and Pfeffer, 2000; Weiss, 2000; Doz et al., 2001; Foster and Kaplan, 2001; Mische, 2001; Coffman et al., 2002; Manzoni, 2004; Underwood, 2004; Holbeche, 2005; Siroat et al., 2005

The underneath above lists the *HPO-characteristics for organizational culture* in order of importance. It gives an overview of the underlying elements per culture characteristic.

Cultural characteristics of HPO

- 1. Empower people and give them freedom to decide and act.** HPOs devolve decision making authority and give autonomy to operate to organizational members, within clearly established boundaries and constraints on what is allowed and what not. Assign responsibility for operational decision making and performance improvement to individuals and work teams because people with the best information and perspective should make the decisions. Empower people to let them feel like owners. Balance control with autonomy but restrict checkpoints. Shift from command and control to creating shared mindsets, stretch goals, and empowered colleagues. Establish a climate of choice and create freedom for individuals to develop their natures and express their diverse qualities, but stress that the liberty of individuals should not be at the expense of others. Let people feel free to question and challenge decisions.
- 2. Establish clear, strong and meaningful core values** and make sure they are widely shared within the company. Become a value-based organization with a common company-wide value system that balances values with rules. Only make commitments that are aligned with the core values. Also have clear ethics which are supported by organizational policies.
- 3. Develop and maintain a performance-driven culture.** Don't assume success is permanent, realize that nothing lasts forever, so abandon inertia and complacency and challenge the enemies of a winning mindset. Have a healthy dissatisfaction with the status quo. Focus strongly on getting high excellence in whatever the organization does, and stimulate people to achieve high performance. Enforce performance-driven behavior and set out to make aspirations reality. Expect disappointments so have discipline in execution and commitment to resilience, thus accomplishing made agreements. Celebrate successes daily.
- 4. Create a culture of transparency, openness and trust** by establishing a shared understanding, openly sharing information and fostering informality. Demonstrate integrity and openness in all dealings with others, tell the truth, and make sure people have the opportunity to be heard. Encourage open and honest debate and create an information ethos in which errors are reported without fear.
- 5. Create a shared identity and a sense of community** by 'uniting the tribe'. Cultivate a feeling of corporateness and adopt and foster an 'all for one, one for all' mentality. Nurture a cohesive, caring culture with committed and motivated people. Eliminate politics by establishing a true meritocracy. Create a positive atmosphere and above all have fun.
- 6. Develop an adaptive culture to achieve long-term success** and constant renewal, thereby combating the risk that success sows the seeds of decay. Go with the existing organizational culture in the short run but be sure to simultaneously shape it for the long run. Shift the driving organizational behavior towards entrepreneurship when resources are readily available, towards collaboration when they are scarce. Watch for strains in the existing organization to time the shifts in organizational behavior. Strive for agility.

Appendix

Table 1. Detailed HPO characteristics

This appendix lists all the elements for each type of literature study (A, B and C). The numbers in columns ‘A’, ‘B’ and ‘C’ refer to the studies from which the elements are taken (see Table 2). To weigh the elements, each element from study type A gets 6 points, B and C get 3 respectively 1 point. The column ‘Total’ calculates the total score for all the elements which have been grouped under a particular HPO-characteristic.

Culture characteristics	A	B	C	Total	% of total	% of sources
Empower people and give them freedom to decide and act	1,1, 2, 2, 4, 6, 12, 12, 14, 15, 15, 18, 19, 20, 21, 22, 25, 26, 29, 29, 31, 31, 34, 35	43, 45, 53, 54, 55, 59, 59, 59, 60, 61	71, 76, 77, 78, 78, 79, 88, 90	182	56,7	36,3
Establish strong and meaningful core values	1, 2, 4, 19, 23, 28, 34, 35, 35	38, 41, 53, 54, 59, 59, 60	62, 65, 66, 70, 75, 76	81	25,2	22,0
Develop and maintain a performance-driven culture	15, 24, 24, 34, 35	39, 41, 48, 54, 54, 54, 59, 60, 60	65, 65, 68, 69, 70, 70, 72, 86	65	20,2	17,6
Create a culture of transparency, openness and trust	1, 2, 11, 12, 16, 18, 19, 20	55, 55, 60, 61	72, 76	62	19,3	14,3
Create a shared identity and a sense of community	6, 17, 19, 19, 31	55, 57, 61	70, 70	41	12,8	8,8
Develop an adaptive culture to achieve long-term success	8, 8	38	71, 71, 87, 87, 87, 87, 91	22	6,9	5,5
Understand the role of culture	11, 11		88	13	4,0	2,2

The score gives an indication of the importance of the characteristic for becoming a HPO. Finally, column ‘% of sources’ divides the number of different sources the aspect is found (this is the numbers in columns A, B and C added up without double-counting) by the total number of literature sources (91). This is a measurement of the frequency of occurrence in the literature of the specific characteristic.

Table 2. Overview of the selected studies

Study title	Authors	Year	Type of research	Research population	Study type
A bias for action	Bruch & Ghoshal	2004	Interviews, survey, case studies	North-American, South-American, European and Asian companies	A
Beyond Budgeting	Hope & Fraser	2003	Case studies	Mainly Scandinavian and British profit organisations	A
Building the flexible firm	Volberda	1998	Survey	Dutch profit and non-profit organisations	A
